ROY HELM DIES IN HOSPITAL

Reinhold (Roy) Helm died in the Holy Cross Hospital in Calgary on Monday after a brief illness. He was 47 years of age.

Born in Russia, he lived at Prelate and Burs-tall in Saskatchewan for several years. He moved to Medicine Hat in 1933 and to Bassano in 1946, where he was employed by the C.P.R. Mr. Helm was a member of the Bassano Evangelical Free Church. Surviving are his wife, Bertha, two daughters, Mrs. Shirley Husband and Carol, a son, Gordon of Bassano, two brothers, Chris of Wimbourne and Fred of Birstall, and a sister, Mrs. Lidya Gruszie of Torrington.

Services were held on Wednesday afternoon from the Knox Presbyterian Church with the Rev. Leon A. Tiede officiating. Interment followed in the Bassano Cemetery. Gooder Brothers Funeral Home was in charge of arrangements.

BIBLE SCHOOL CLOSING PROGRAM

The closing program of the Vacation Bible School will be held in the Bassano Evangelical Free Church on Friday evening at 8:00 P.M. Besides special numbers and items on the program there will be a display of the handiwork that the children have made during the vacation classes.

Mrs. V. Strom, a missionary recently returned from Japan, will appear in Japanese costume and both Rev. and Mrs. Strom will sing in Japanese.

It is expected that the program will be held in the new Church Auditorium.

The Vacation Bible School has enjoyed a good attendance this year, an average of 75 pupils attending each day, and the response of the children has been very encouraging. The school this year has been conducted by Miss Bessie Gingrich.

BLOOD DONOR CLINIC AT ROSEMARY

A Blood Donor Clinic will be held at Rosemary on Thursday, August 16th from 1:30 to 4:00 P.M. As a clinic will not be held in Bassano this year it is expected that Bassano citizens will attend the clinic at Rosemary in order to donate their blood to the Red Cross.

Bassano and district citizens are urged to support this great cause. The Bassano Hospital requires approximately 75 bottles of blood each year and it is the civic duty of the local people to donate at least enough blood to satisfy the requirements of the local hospital. Blood transfusions has proven to be one of the major life saving miracles of our time and practically the entire supply of blood is obtained by voluntary donation. Citizens from other parts of Alberta should not be expected to donate their blood for the use of the local people in the local hospital. BE GENEROUS! DONATE YOUR BLOOD AT ROSEMARY ON THE 16th!

The Blood Donor Clinic is held under the auspices of the Red Cross Blood Transfusion Service. The local director is George I. Penner of Rosemary.

NEW STORAGE DAM IN PLANNING STAGE

P.F.R.A. engineers are surveying the site of a new storage dam near Bassano at present. It is reported that it is planned to construct a new dam two or three miles west of the Bassano Dam in order to impound an additional supply of water for use each spring and early summer.

TOWN TOPICS

Dr. and Mrs. Keith left on Monday for an extended holiday.

Bob Schornagel took the early morning train on Sunday bound for the Cadet Training Camp at Vernon, B.C. He will be attending a Junior Leader's course for two weeks.

John and Roger Brown left on Wednesday for a week's holiday at Camp Oliver.

The Fire Brigade answered a call from Jake Schaffer's house last weekend but could not find a fire. Someone had mistaken steam coming from a safety valve of a propane tank for smoke.

The Donkey Ball game scheduled to be held on Monday night was a disappointment to the large crowd of spectators who came to see it. The show and the donkeys failed to make their appearance and the game was cancelled.

The Town has bought a piano for the Bassano Hall and will not find it necessary to borrow one in future.

Mrs. Shirley Cote is visiting her parents, Mr. and Mrs. Art Hellwig at Blairmore. She expects to be away about two weeks.

Misses Margaret and Dana McQuarrie were visiting in Bassano this week.

Miss Jean Wallace boarded the train on Monday to visit her father in B.C. She plans to holiday for three weeks. Mrs. Maude Knight is taking Miss Wallace's place at the Telephone Office until her return.

Don't forget to attend the Blood Donor Clinic at Rosemary on Thursday, August 16th.

The Cambridge Drilling Co. has moved the rig to Drumheller, where it is planned to drill several wells. It is expected that the crew will be back during the early winter to drill several more test wells in the Bassano district.

Mr. and Mrs. William Redmond spent the weekend in Calgary visiting with their son Ted and family.

Rumor has it that two more new residences will be constructed in town before the end of the year. Bassano is still growing.

The crops in the Bassano district are looking well and prospects are for a better than average yield this year. Some barley has been swathed and the continuance of the present hot weather will soon cause harvesting operations to begin everywhere.

Mr. and Mrs. W. Redmond visited in Brooks last Wednesday at the home of Mr. and Mrs. Leo Newby.

Rev. and Mrs. Don Flint and family have been visiting in Bassano for the past week. Rev. Flint is acting as guest minister of the Grace Presbyterian Church in Calgary at present. He used to be the minister of Knox Presbyterian Church in Bassano during the early 1940's.

Mr. and Mrs. Ernest Coles and family have returned from their holiday trip down east.

Mr. and Mrs. Fred Rathje have returned from an extended motor trip through the States.

Holiday blues

(From The Melville Advance—July 11, 1956)

People, in general, have never had it so good. They make more money than they ever did before and they spend more money than they ever did before. But our way of life has become a little too hectic, a little too fast and furious, for us to keep grinding away without an annual respite of some kind.

Summer time is holiday time, and practically everyone wants to get away from it all, for a short time at least. All year long they have had their noses to the grindstone; they have fought through the heavy bills of winter; and have managed to save enough with which to pay their income tax. Whatever money is left, if any, is the deciding factor in the question of where to spend the holidays.

The lucky ones—those who have been overtaxed and have something coming back to them—will possibly decide to take a nice fat car trip to the coast, or maybe even as far as California. Those who have nothing coming back to them have to settle for a vacation spot that is nearer at hand. Those that don't pay income tax at all haven't been working long enough to get a vacation anyway.

Regardless of where a person goes, the irony of the situation usually is that they've worked so hard at having a vacation they are worn to a frazzle by the time they reach home again. They return to work in a worse physical shape than when they left, and it usually takes a week or two before they have fully recovered.

The hardest working vacationer of all, however, is the fellow who jumps into his car, packs his wife and kids into the back seat with the baggage, steps on the gas and heads for some far distant horizon with a gleam in his eye. His anticipation is overwhelming. He visualizes all the things he is going to do when he reaches his holiday mecca and his foot presses even heavier on the gas. Before he has gone 10 miles the kids are fighting; by the time he's gone 50 miles everybody's fighting. And by the time he has gone 100 miles he is no longer able to visualize anything. All he can do is hang onto the steering wheel, grit his teeth and hope it will all soon be over. This fellow usually ends up his holidays thoroughly disillusioned and broke.

Then there's the guy who plays it smart and heads for the lake. He grabs his fishing gear, jumps into a boat, and roars off over the lake, his smile disappearing with him in the distance. Even though he is out of sight he imagines he can still hear the soul-shattering shrieks from his children as they really let loose in the great out-of-doors and chase round and round the cottage trying to scalp each other. A smirk of satisfaction crosses his face briefly as he settles back in the boat and waits for the fish to bite.

About sundown the same day he gets back to the beach badly sunburned and mosquito-bitten, he hasn't caught a thing. On top of everything his wife informs him that little Johnny has been walking in a poison ivy patch. By the time this guy gets back to the office he's a nervous wreck.

But the fellow that doesn't go anywhere for his holidays is probably just as badly off as the others. He just loaf around restlessly at home, not doing anything in particular and feeling miserable about the whole deal. Then suddenly he finds he has visitors. His Uncle Joe and Aunt Minnie from Hotternell, Florida, have decided to bring their 14 kids with them and spend their holidays visiting relatives in Canada. This poor guy is first on their list. By the time they leave he is contemplating the use of DDT as a seasoning for their porridge.

And by the time this guy's holidays are up, he means the fact he didn't take off for sunny Siberia or some such exclusive resort.

At any rate, it can easily be seen that summer holidays are really a necessary evil. It doesn't really matter whether you leave town or stay at home, you're in for a rough time either way. The best thing to do is just pack your bags, grin, and pretend you're enjoying yourself.

One consolation though, it's like hitting yourself on the head with a hammer—it feels so nice when you stop! (Editor's note: Space permitting you'll find an article on treatment of poison ivy elsewhere in this edition.)

STAINS REMOVED

Rust from a clothesline can leave bothersome stains on garments. But these can be removed by sprinkling salt over the stain, moistening it with lemon juice and then exposing it to strong sunlight, renewing the lemon juice occasionally.

ALUMINUM BUILDING

Holland's first aluminum building is being constructed here in order to save bricks for the country's drastic housing shortage. Enough bricks for 30 homes will be saved.

LOSE A MINUTE—SAVE A LIFE

CAT UNDER A HOT TIN HOOD—Trouble driving? Purr-haps there's a cat under the hood. Chicago motorist Gerald A. Griffin found one wedged between the fan belt and the radiator of his auto. He had driven a block when a loud screech alarmed him. The clawing feline is shown as she is removed from the car by an Anti-Cruelty Society attendant.

How about 'pop' standing in the corner as a nifty lamp holder

An Englishman who has been in Canada only five weeks, said he hopes to introduce his favorite hobby here. Louis W. DuChemin spends his spare time getting people plastered.

And what's more, he says anyone can take up the hobby in the kitchen or bathroom.

When Mr. DuChemin speaks of getting plastered, he means just that. What he does is to make plaster casts of faces. He has also made casts of children's hands.

At present, he is starting his biggest effort, a life-size figure of a man with arms aloft, holding a foisted glass bowl containing two electric lamps.

"Where else could you buy a lamp like that?" he asks. "And even if you could buy it, it would cost about \$500. Mine will cost \$50 at most."

The "Man with the lamp" will be modelled on Marcel Deschamps of Montreal at whose home DuChemin is staying until his wife and five children arrive from England.

The friends met while they were CNR waiters. Deschamps has been a waiter all his life, but for DuChemin it was only one in a long series of jobs.

The 36-year-old Englishman, has been a hotel keeper, interior decorator, steward on the Queen Mary and a gunner and wireless operator with the RAF during the war. He also ran his plastering hobby into a job in England and worked with a large record company making novelty records.

DuChemin says sweethearts should stop sending each other photos. Instead they should get a friend to make a plaster cast of their faces and send it along, with a recording of their voice.

"That way it's just like 3-D," he says, "and you get the full effect, including depth and sound."

DuChemin has dealt with sweethearts before. In England he made

POISON IVY

Most people are susceptible to the rash caused by poison ivy, some being affected only by contact with the plant while others may suffer from mere proximity. The rash consists of a mass of red blisters which itch and burn. Everyone should learn to recognize the plant and avoid it. Even those who have enjoyed immunity for years may be susceptible eventually, so it is very wise to keep well away from any part of the plant... roots, leaves or berries.

If there has been any contact with poison ivy, the skin should be washed as soon as possible with strong household soap or detergent. If the rash appears calamine lotion is often helpful in allaying pain or itching. Compresses of a solution of epsom salts or baking soda may ease the rash.

a record for a youth who was too shy to propose to his girl. He then recorded her acceptance on the reverse side to take back to the fellow.

"But it's time I settled down now," he admits. "A man usually spends the rest of his life doing what he is doing at 40. I haven't got much time."

Here is his recipe for making a cast.

Smear the subject's face with vaseline, particularly the eyebrows. Mix a batch of dental plaster (ordinary plaster won't do) in warm water and drip it onto the face. Two drinking straws may be put in the nostrils to allow breathing.

When nearly dry, cover with pieces of gauze, then mix more plaster, adding a little alum to allow it to dry faster, and cover the gauze. When the outside plaster is dry remove the mask. The inside plaster should be still soft.

Smooth the inside, and when

Fire is a killer

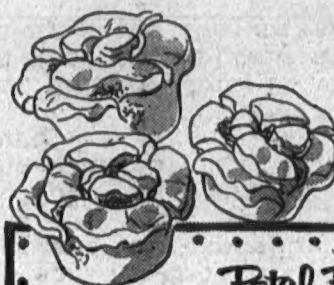

The careless use of flammable liquids took the lives of four more rural residents during the first three months of 1956, and petroleum products were listed among the six leading causes of fire.

Farm lives and property can be safeguarded against this fire and explosion hazard by the proper storage and careful handling and use of these liquids.

1. Never try to light or quicken a fire with gasoline or coal oil. There is no safe way to do so.
2. Never attempt to clean clothes with flammable liquids.
3. Use extreme caution with gasoline or kerosene stoves.
4. Store gasoline in a red metal container and coal oil in a blue metal container, well away from sources of heat. Do not carry or store gasoline or coal oil in glass containers.
5. Store bulk gasoline in an underground tank or if above-ground, at least 75 feet from the nearest building.
6. Make certain that oil burning equipment is properly installed and serviced by a qualified serviceman, and that such burners bear the approval label of the Canadian Standards Association or the Underwriters' Laboratories Incorporated.
7. Never refuel motors, vehicles or other machinery while they are running and do not let them run in an enclosed building.
8. Keep foam, dry powder, or carbon dioxide fire extinguishers handy. Your local fire chief will be glad to recommend an approved and effective type.
9. Teach children respect for flammable liquids by personally following good safety practices.

dry, shellac it. When the shellac is dry, cover the inside of the mould with olive oil or a similar grease, and repeat the plastering process used to make the mould.

Decorative and delicious

As dainty and decorative a treat as you can make to grace a table... and so delicious, too! Use Fleischmann's Active Dry Yeast for all your home baking... you'll find it easy to work with and so dependable!

Petal Buns

1. Measure into bowl
1 cup lukewarm water
Stir in
1 tablespoon granulated sugar
Sprinkle with contents of
3 envelopes
Fleischmann's
Active Dry Yeast
Let stand 10 minutes, THEN stir well.
2. Meantime, cream until soft
½ cup butter or
margarine
Gradually blend in
½ cup granulated sugar
1 teaspoon salt
Add, part at a time, beating well after each addition
4 well-beaten eggs
Stir in dissolved yeast and
3 cups once-sifted
all-purpose flour
and beat until smooth and elastic.
Work in an additional
2½ cups (about)
once-sifted
all-purpose flour

3. Turn out on lightly-floured board and knead into a smooth ball. Place in greased bowl and brush with melted butter or margarine. Cover. Let rise in warm place, free from draft, until doubled in bulk, about 1 hour.
4. Punch down dough. Divide into 3 equal pieces; roll each piece into an 8-inch square. Spread each square with
1 tablespoon soft butter or margarine
and then with
thick raspberry jam

Roll up as for jelly roll and cut into eight 1-inch pieces. Place in greased muffin pans and cut on X in each bun with a pair of scissors. Brush buns with melted butter or margarine. Cover. Let rise until doubled in bulk, about 1 hour. Bake in a moderately hot oven, 375°, about 15 minutes.
Yield—24 buns.

THE OBSERVER

BY HUGH PEARCE

Probably some of the local citizens know that a new train has been added to the train service between Medicine Hat and Calgary and some of you may have seen the new "Dayliner" going through Bassano. I understand that this service is on a temporary basis only and that it is intended to review the value of the "Dayliner" service when the regular winter schedule takes effect in September.

This "Dayliner" travels from Moose Jaw to Calgary in one day and returns to Moose Jaw the following day. At present it travels on a slow schedule (judging by present day standards) as it travels on the old steam train schedule. The new train, however, is capable of travelling much faster than it does at present and, if business warrants the continuance of the new run after the present trial period, a faster schedule for this train would be instituted when the winter service comes into effect.

Since the local train was discontinued last Spring, we have had very poor local train service between Bassano and Calgary. In order to travel to Calgary and return in one day (only a round trip of 180 miles) it has been necessary to catch the train about 4:30 A.M. and return home again about 11:00 P.M., a long day for anyone and especially so if you take a young family along. This new "Dayliner" service could be arranged to give us faster and more convenient service to Calgary or Medicine Hat and return if the C.P.R. could be shown that a daily service on an express schedule would be popular with the travelling public. I have heard a rumor to the effect that the C.P.R. might put on two "Dayliners", one to leave Moose Jaw and the other leaving Calgary each morning, if public demand warranted such a move. These trains would carry passengers and fast express I believe and would undoubtedly give us a faster and more convenient local service than we have had for some time.

I would suggest that each individual of the travelling public in Bassano and district and the Bassano Board of Trade either sign a petition or write individual letters to the Superintendent of the C.P.R. at Winnipeg urging that a daily "Dayliner" service between Moose Jaw and Calgary be put into effect as soon as possible. Such action on our parts could do no harm and it might be the means of improving our local train service tremendously. Remember the old motto - "it's the squeaking wheel that gets the grease"? Let's all squeak together and try to get this new train service to Bassano increased to one Dayliner each way every day, including Sundays, as soon as possible! The Bassano Board of Trade could also help by taking the matter up with the Boards of Trade in Gleichen and Brooks with a view of adding extra weight to the movement. Is anyone interested in this idea?

I would like to mention that I have not seen a practice drill of the Fire Brigade for a long time (with the exception of an alarm last week). While the majority of the firemen can handle the work they are required to do without a practice, it seems to me that the chances are good that the men who are responsible for the operation of the fire engine might happen to be away on holidays and it could cause a delay in getting to a fire if an inexperienced operator was at the controls. A test of the equipment occasionally might show the weak spots in hose, tires, etc., and thus reduce the chance of a failure while fighting an actual fire. Then too it would be reassuring to know that all fire hydrants are in working condition and ready for action.

Firm to open up new freight road from Meadow Lake to Uranium City

An agreement has been reached between the Government of Saskatchewan and the newly-formed Meadow Lake-Uranium City Freightways Ltd., for establishing a freight service in the northern regions of Saskatchewan.

Resources Minister J. H. Brockelbank said that the company, which will provide service particularly in the Beaverlodge area, proposes to construct and maintain a road suitable for transporting freight in substantial quantities.

"The company proposes to start transporting freight from the north end of Lake Wasekamio and from there in a northerly direction to the south shore of Lake Athabasca," he said. "At present they are concentrating their efforts on a winter route and then will set up a summer route."

Mr. Brockelbank said the company, whose officials are all businessmen in Meadow Lake, has agreed that by March 31, 1957, the road will be in a sufficient stage of completion and in suitable condition for carrying freight in substantial quantities; and that warehouse service will be provided.

The Meadow Lake-Uranium City Freightways Limited winter road will take advantage of frozen lakes along the route. It will cross over Churchill, Frohisher and Wasekamio Lakes to Lloyd, Forest and Patterson Lakes, and over numerous small northern lakes to the south shore of Lake Athabasca, and from there to Bushell and Uranium City. The summer route will be parallel to the lakes, but all on land.

Promotes development

"Establishment of this new venture in the Beaverlodge area will see further development of that area, as well as service to any new settlements on the way there," said Mr. Brockelbank. "In addition to providing an alternative supply route to the mining areas of the far north than by aircraft, it is anticipated that the services will be used for exporting fish and other natural produce."

Cattle disease spreading in Alberta

Vibriosis is a disease of cattle that has been recognized for many years but it is now spreading in Alberta. It is a disease characterized by abortion and sterility, and can of course, become a serious economic problem.

Vibriosis was not diagnosed in Alberta until 1953, and in 1955 it was positively diagnosed in seven herds. Many Alberta cattlemen are becoming seriously alarmed at the spread of this disease. Dr. J. G. O'Donoghue, Alberta's Extension Veterinarian, reports the bull is the carrier.

Fish scales are used in making artificial pearls.

Helps You Reduce Swollen Painful Piles

Here is a nice, clean, easy way to get real relief from the nagging distress of swollen, painful piles without the inconvenience of ointments, pile pipes or suppositories.

The secret is in taking just one small Hem-Roid Tablet, with water, two or three times a day. Works through effective INTERNAL action. Quickly eases constipation, relieves itching, soreness and pain. Helps shrink piles and permits them to heal.

Why suffer needlessly when Hem-Roid offers you so much. Get a package today. See for yourself how nice Hem-Roid is to use, how effective it is and how much more comfort it will quickly bring you. All drug stores. Low cost. Money refunded if you are not 100% pleased.

Canadian dentists accredited

Five dental schools in Canada, including McGill and the University of Montreal dental faculties, have been given full recognition by the American Dental Association, it was disclosed at the association's headquarters in Chicago.

Thus, for the first time, dental schools of another country will be placed on the list of accredited schools issued by the association's Council on Dental Education.

The other schools accredited in Canada are: The faculties of dentistry at the Universities of Toronto and Alberta and at Dalhousie University.

The Canadian schools have already been accredited by the Canadian Dental Association in a program of standards worked out in co-operation with the American Dental Association.

Dr. Shailer Peterson, secretary of the Council on Dental Education, Chicago, said the accreditation of Canadian schools of dentistry "is another move to assist in an interchange of professionally qualified personnel between the two countries, and will encourage a greater exchange of educational opportunities."

CHILDHOOD SYMPTOMS
Lack of appetite, feverishness, rash, sore throat, restlessness and irritability are often symptoms of one of the more serious childhood diseases. In such case it is wise to consult the family doctor or local health clinic.

TWIST SEASONS—The change from summer to fall will be graced with this transition ensemble, above. Topping off the season-bridger is a red plaid, sleeveless bell-hop jacket. It buttons in brass over a gray cotton dress with scooped neckline and skirt of unpressed pleats.

Woodland friends

7306

by Alice Brooks

IT'S EASY to make a needle-pointing! Just follow our transfer and color-charts—make this woodland scene your next picture. Everybody loves these fawns.

Pattern 7306 transfer 15 x 19 1/2 inches. Simple stitches, gay colors, add up to a pretty picture!

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department, Department P.P.L., 60 Front Street W., Toronto.

Two FREE patterns—printed in the new Alice Brooks Needlecraft book for 1956! Stunning designs for yourself, for your home—just for you, our readers! Dozens of other designs to order—all easy, fascinating hand-work! Send 25 cents for your copy of this wonderful book right away!

Strictly Fresh

A butcher had a rough time ordering a full-course dinner in a swank downtown restaurant. He was trying to make both ends meet.

Twenty-one: that which girls younger than try to look as old as, and women older than try to look as young as.

A trained seal act got top billing in a travelling variety show. Oh, dem golden flippers!

Wives whose husbands have ever had to walk the picket line know that too often it's only one strike and you're out.

Necessity is the mother of inventions. Politics is the mother of conventions.

Major increases in road mishaps

Based on May statistics, the number of motor vehicle accidents, deaths, and injuries, and extent of property damage in Saskatchewan appears to be increasing at a substantial rate over the comparable toll last year.

According to provincial highway traffic board statistics, in May of this year there were 605 motor vehicle accidents reported in the province, compared with only 481 in May of 1955. Similarly, the May, 1956, death toll was 10 compared with only three in May, 1955; and 269 persons were injured in May, 1956, as against only 150 the previous May. In addition, property damage in May of this year reached a total of \$225,142, while the figure for the same month last year was only \$148,657.

Commenting on the comparison, traffic board officials pointed out that the year's most dangerous driving months were still ahead, and urged all motorists to do everything possible to help cut down on highway accidents.

Portugal is the world's principal cork producer. 3208

More Comfort Wearing FALSE TEETH

Here is a pleasant way to overcome loose plate discomfort. **FAB-TEETH**, an improved powder sprinkled on upper and lower plates holds them firmer so that they feel more comfortable. No gummy, gooey, pasty taste or feeling. It's alkaline (non-acid). Does not sour. Checks "plate odor" (denture breath). Get **FAB-TEETH** today at any drug counter.

World Happenings In Pictures

PUT ANOTHER TWOPENCE IN—It's the world's oldest juke-box with a built-in brass section. Ann Dunn holds a king-sized record for the "polyphon", made in Leipzig, Germany, over 120 years ago. The polyphon still produces music for patrons in a London, England, restaurant. When a coin is deposited in the side of the machine, the brass disc rotates, striking keys in music-box fashion.

SHE IS A "DO IT YOURSELF" FAN—Theresa Ann Stedman, aged three, vaccinated herself. Theresa was jealous when her sister Margaret, (left), five months, was vaccinated for smallpox and gained considerable family attention. So Theresa borrowed the bandage from Margaret's vaccinated arm and put it on a mosquito bite on her own big toe. The family doctor said he couldn't have vaccinated Theresa any better himself.

WALKIE-TEEVEE—Resembling a one-man electronics laboratory, this French reporter uses the latest in television reporting equipment. The extra-light equipment enables operators to provide on-the-spot coverage of important news events for TV audiences.

WE'LL TAKE RUSSIAN ROULETTE—Mrs. Sylvia Raibaut, from Chatou, France, talks to reporters on arrival as a stowaway aboard the liner Ile de France in New York. She came to the U.S. in search of a GI who has not written to her since Christmas. She said the American was Kenneth Moritz, of Springfield, Pa., whom she met in 1947 when he was serving with the U.S. Army Engineer Corps. She will have to remain aboard the ship and return to France.

HEAT GOT YOU BEAT? GRIN AND BARE IT—One surefire method of surviving the sizzling summer is with a cool pool. Witness the ladies in wading, left, Martine Dowling and her silent bronze partner enjoy the fountain in the Place de la Concorde in Paris, France. In another section of the same city, a young lady strips for action, prior to a cooling dip in her birthday suit at a local pool.

SHOULD HAVE STAYED HOME—W. B. Warren, 85, of Flint, Mich., decided to straighten his car out while backing out of the garage. In the process, he ruined one lawn, two garages and three cars. After sliding his car onto the lawn, he lost control while trying to regain the driveway and hit his own garage, after which the car careened into his neighbor's garage, and pinned a sports model against a larger sedan.
